

15, rue Saulnier,
Puteaux 92800,
France.

Hello,

The web development & project management fascinates me and I look forward to working in this environment. With this letter and the attached materials, I would like to formally apply for this position. I'm also excited to learn more about the core values at Enterprise such as services, hard work, community and fun, as these fit with my own work values. I'm always motivated to learn new languages and I'm doing that to improve my French skills.

I finished masters in System Integration & Project Management at the **Institut supérieur d'électronique de Paris**. I've done 6 months of internship in **Akcelia Network** as a web developer & I look forward to applying my strong development and management skills in my job. In my previous job experience, I worked as a web designer & developer. In my academic program I have done the web application projects. In bachelors, I was a member of student association, I worked on a team of 8 members to foster the academic, social, and cultural programming in a school. It was through this experience that I became aware of my passion for leadership and teamwork and where I learned the importance of effective interpersonal communication. I will use these skills as a successful candidate at your Enterprise.

I would like the opportunity to meet with you and discuss my qualifications in greater detail. I will follow up with you in two weeks to check on the status of my application.

Thank you in advance for your consideration.

Sincerely,
Aditya KHOT
